SOCIOLOGICAL (RE) IMAGINATION: PRACTICES IN A SOCIOLOGY CLASSROOM

The discipline of sociology has the potential to accommodate and transform, to create discomfort and bring hope at the same time. While C. Wright Mills propagated the entanglement of biography and history, Rege taught us the importance of prajnya and samata. Keeping these as the points of departure, this lecture intends to reflect on pedagogic practices of teaching sociology in a public university in Delhi. The lecture intends to look at ways the discipline embraces interdisciplinarity, enabling us to re-turn to sociology through experiences and texts.
